Virginia Healthcare Emergency Management Program

The Virginia Healthcare Emergency Management Program (VHEMP) was created in 2002 through a partnership between the Virginia Hospital & Healthcare Association (VHHA) and the Virginia Department of Health (VDH). The program aims to enable the Commonwealth's health care delivery system to prepare, respond to, and recover from natural and man-made disasters. Funded through the Administration for Strategic Preparedness and Response's (ASPR) Hospital Preparedness Program, the program consists of four regional healthcare coalitions designed to foster collaborative planning efforts between healthcare facilities, first responders, and community partners at the local and regional level. These collaborative efforts aim to identify and address gaps in the health care system's ability to effectively respond to a disaster. Each healthcare coalition operates a Regional Healthcare Coordination Center (RHCC), a 24/7 operations center designed to be the coordination and communication hub for health care and community partners during a disaster. Additional information about the program can be found at www.vhass.org or by contacting staff below.
